

DATALIGHT® Fibre Kit

product description:

The DATALIGHT Fibre Kit 100 consists of 100 m Duplex Fibre 2.2 DATALIGHT, four LAN Access Points 2-Port DATALIGHT, a Switch 6+2-Port DATALIGHT and a Cutter.

Use the DATALIGHT Fibre Kit for a future-proof and flexible network installation in new or in existing buildings. With the included four LAN access points up to eight devices can be linked in the network. The included switch delivers even space for later upgrades. Because of the thin and flexible fibre, a network can be installed at any time without big reconstruction work.

Due to the Duplex Fibre DATALIGHT, electrical installation and data network can be installed in a single conduit. This allows also the installation of the fibre through the existing conduit system.

The enclosed cutter allows immediate installation without further special tools. The optical fibre can theoretical manage bandwidths of over 1 Gbps- even in the far future no change will be necessary.

Hotline

Since technical developments cannot be foreseen, electrical installations should provide the possibility to be expanded at any time.

If you generously install a system of unused conduits today, you can easily expand your electrical installations later.

You save lots of time, money and effort!

We are happy to help you with any technical questions.

Prompt information can be obtained from our technical consultants at +49 9525 88-8123.
