

DATALIGHT® Kit

product description:

The DATALIGHT Kit 100 consists of a 100 m ring FFKuS DATALIGHT, four LAN Access Points 2-Port DATALIGHT, a Switch 6+2-Port DATALIGHT, a Cutter and four flush-mounted sockets. Use the DATALIGHT Kit for a future-proof and flexible network installation. With the included four LAN access points up to eight devices can be linked in the network. The included switch delivers even space for later upgrades.

Due to the FFKuS DATALIGHT conduit, electrical installation and data network can be installed in a single operation. The enclosed flush-mounted sockets and the cutter allow immediate installation without further special tools.

If several flush-mounted sockets are already equipped with FFKuS DATALIGHT during the installation, another access point can be connected anytime, so the network can be flexibly expanded.

Hotline

Since technical developments cannot be foreseen, electrical installations should provide the possibility to be expanded at any time.

If you generously install a system of unused conduits today, you can easily expand your electrical installations later.

You save lots of time, money and effort!

We are happy to help you with any technical questions.

Prompt information can be obtained from our technical consultants at +49 9525 88-8123.
